

WORLD HAPPENINGS  
BRIEFLY TOLD

Reports prepared by J. D. Soper on Canadian expeditions to the Arctic, will be complete in 1926.

Rev. John Carter, 64 years of age, son of John Carter, Toronto, has been elected mayor of Oxford.

H. J. Browne, meteorologist of Washington, D.C., predicts 1926 will be a year without a summer with agriculture almost impossible.

The new Canadian Red Cross Hospital was formally opened at Englehart, Ont., by Hon. Lincoln Goldie, provincial secretary.

More than 400,000 people travelled by water between Canada and the United States during the year ending June 30th, research bureau shipping board records reveal.

A memorial tablet to the late Sir William Price was unveiled at the Armistice memorial service held in St. James' Anglican Church at Kenogami, Nov. 8.

With the 1925 season of navigation nearing an end, statistics compiled at the port of Quebec show that 78,288 passengers were landed up to Nov. 7, bound for Canada and the United States.

Sir Horace Rumbold, British ambassador to Madrid, will head the commission of the League of Nations, which will inquire into the reasons for the fighting between the Bulgars and the Greeks recently.

The Manitoba Power Company will spend \$2,000,000 in new equipment and transmission lines following successful negotiations for supply of power to the Manitoba Pulp and Paper Company mills at Port Alexander.

The "death ray" inventor can make music come from beams of light. H. Grindell Matthews has shown how his lunaphone works. He also has a device for advertising in colors in the clouds.

After working on his invention for sixty years, John Smith, engineer of Winnipeg, claims to have perfected a "stationary engine capable of controlling and producing its own, self-manufactured power." He has a "perfect" model on demonstration.

Vice-Admiral Sir Roger Keyes, commander-in-chief of the British Mediterranean fleet, was slightly injured when an aeroplane in which he was riding crashed into the sea. The pilot and another officer in the plane suffered slight cuts and bruises.

## Big Slump In Shipbuilding

Industry Suffers Most Decided Drop Since Great War

Shipbuilding throughout the world suffered its most decided slump since the war during the last summer, the department of commerce announced recently.

Reports for the third quarter of 1925, ended Sept. 30, received from Lloyd's Register, showed a drop of more than 150,000 tons.

Motor vessels declined 40,000 tons during this period, construction of other classes of ships, it was stated, has been decreasing steadily.

Construction in this country dropped 22,000 tons, while the decrease in Great Britain and Ireland was reported to be 84,000 tons. The largest decrease was reported from Germany with a 100,000-ton drop. France declined 19,000 tons and Denmark 7,000 tons.

Italy and Holland showed the only increases in work started during this period.

## May Be Important Discovery

Cancer Scourge Is Cured By Lead Says Liverpool Professor

Selecting a meeting of the Toronto Academy of Medicine for an announcement of world-wide interest to the medical profession and victims of cancer, Prof. W. Blair Bell, of Liverpool University, and honorary director of the Liverpool Cancer Research Institute, told leading physicians of the city of the successful treatment of the dread disease by the chemical agent, lead. He cited several instances in which remarkable success had been achieved, and assured the members of the academy that 50 or so patients were believed to be well, out of about 200—mostly hopeless cases—treated.

## Many Savings Accounts

There were 101,516 savings accounts in Hawaii banks during the past year, totalling \$21,708,371.75. Anglo-Saxon accounts registered the highest total, while savings deposits by Japanese increased more than \$1,000,000 over the previous year.

Remember there is a limit to human endurance. The friend who stands up for you may tire in the course of time and sit down.

W. N. U. 1603

## Wide Phone Service

Long Distance Service In Alberta Has Been Made Continent-Wide

With due ceremony, the inauguration of the continent-wide telephone service from Alberta was celebrated recently, when Governor Brett of Alberta conversed over the long distance telephone with state officials in the states of Montana, Colorado and Arizona, and with Chief Justice Anglin at Ottawa, Ontario. The inauguration of this service, by which Alberta telephone subscribers will be able to converse with any point in the United States and with many points in Eastern and Western Canada and on the coast, was made possible through the co-operation of the Mountain States Telephone Company with the Alberta Government Telephones. Repeaters have been installed at Lethbridge, Calgary and Medicine Hat, and copper circuits set up from Lethbridge to the boundary of Montana, linking up with copper circuits extended north from Shelby, Montana. This has made possible the connection with the transcontinental system in the States.

In connection with the historical step taken by the Alberta Government Telephones, it is interesting to note that long distance service in the province has grown from 1,000,000 to 2,500,000 calls in the past ten years, and that in that time the revenue from long distance service has grown from \$393,300 per annum to over \$1,000,000 per annum.

The first commercial call over the new universal system was given from Edmonton, when a resident of Edmonton conversed with a friend in Minneapolis, Minnesota.

## Advance In Medical Science

Toronto Doctor Announces New Serum For High Blood Pressure

A serum which may reduce the morbidity of high blood pressure was described by Dr. F. H. G. Starr, of Toronto, Canada, in an address before the clinical congress of the American College of Surgeons, Philadelphia.

Dr. Starr said that William J. McDonald had been working on the serum in the research laboratories of the University of Toronto for some time, but that it had not yet reached a point to permit a detailed description or an optimistic statement of its probable efficacy. He said the serum was a liver extract. High blood pressure, he explained, usually was due to hardening of the arteries, which is induced by an inflammation, possibly of germ origin.

## Edmonton Attains Majority

Was Officially Created A City on Nov. 7, 1904

Edmonton became an adult among cities on Nov. 7.

Just 21 years ago, on November 7, 1904, Edmonton was officially created a city. Since that date the population has grown from 7,500 to 65,378.

There are 20 trains entering the city daily, as compared with one then; 13,484 telephones in use where 450 supplied the baby city.

The fur trade and the Klondike rush put the city on the map in the early days. Now it is the legislative and educational centre of the province and the distributing point for Central and Northern Alberta, as well as the gateway to the Arctic fur lands.

## New Colonization Plan

Community Move of British Settlers to Canada Is Proposed

While the department of immigration is working with the overseas settlement board on a full cooperative plan for the purpose of increasing immigration to Canada from the United Kingdom, a deal was made at the department of any personal knowledge or official connection with a new scheme of colonization, reported from London, calling for the migration of 50,000 families to the Dominion within a period of five years.

These families, according to the cable report, were to be settled on Canadian farms in communities, and not in colonies.

## Ashes of Climber Scattered

From the summit of one of the highest mountains in the lake district, north of England, the cremated ashes of Seymour Gubb were scattered to the wind as a fitting funeral rite for a mountain climber. Mr. Gubb, who for 33 years was headmaster of Taunton's School, Southampton, has been noted as a mountain climber for many years. Fellow climbers conducted the funeral service.

She: "My father gives me a dollar every birthday. I have now eighteen." He: "How much does he still owe you?"

Many a woman uses make-up merely because she hasn't the cheek to do without it.

## Surgeons Revert To Old Practice

Doctor at Johns Hopkins College Tells How Injections Purify Blood

Modern surgeons have partially reverted to a practice of the Dark Ages, when blood letting and leeches were considered the most efficacious of remedies.

The medical wizards of those ages believed the blood stream carried all diseases. When a man in those days had a fever, a cold, or affliction of any sort, a "chirurgion" was called in and his patient was at once bled.

But, although modern science has returned in part to this practice, it is teaching also that the blood stream can be purified with powerful injections—known as digermicides.

All this was brought out by Dr. Hugh M. Young, of Johns Hopkins Medical College, in explaining the work undertaken by the American College of Surgeons in the formation of a committee on antiseptics, of which Dr. Young is chairman, to gather material for a vast symposium on modern antiseptic surgery.

This work is undertaken as a memorial to Lister, the hundredth anniversary of whose birth will be celebrated April 15, 1927. Lister, working on Pasteur's theory of the germ origin of infection, by his antiseptic discovery, laid the foundation for modern surgery.

## Circles Globe In Small Boat

"Library Navigator" Travels 38,000 Miles in Homemade Craft

Circumnavigation of the globe in a 34-foot sail boat was accomplished by Harry Pidgeon, 54 year old photographer, known to many as the "library navigator." He made port at San Pedro, Cal., after travelling 38,000 miles in his homemade cockle shell craft, the Islander, since he set sail from San Pedro, November 18, 1921.

The Islander traversed seas notorious for bad weather. Leaving San Pedro, she went to the Marquesas Islands in the South Seas to Torres Straits, across the Indian Ocean to Mauritius and southwest to Capetown. Then she made St. Helena and crossed the Atlantic to Panama. She left the canal zone last August 7.

Pidgeon was dubbed the "library navigator" because of the unusual manner in which he obtained seafaring knowledge. With books from a branch library here, he spent what time he could spare from the construction of the Islander in studying navigation. All his information about sailing was acquired in this way.

## Trying To Make

Easter Fixed Date

Second Sunday In April Each Year Being Considered

It remains only for the international conference to put into effect in 1928 the fixing of the second Sunday in April as Easter Sunday every year, according to Moses B. Cotsworth, director of the International Fixed Calendar in Toronto. In conference with board of trade officials relative to the furthering of the 13-month-year idea, with its four weeks in a month and Leap day features. Mr. Cotsworth is a Vancouver, B.C., man, but has spent most of his time of late years in New York and London and in Geneva, where he acted as expert for the League of Nations in the subject of international reform of the calendar.

While the change in regard to Easter Sunday and its contingent movable feasts affects only the Christian nations, Mr. Cotsworth regards it as a step in the eventual adoption by the whole world of the fixed calendar idea.

## One Ticket For Fourteen

Mother Had Proof That Thirteen Boys Were All Under Five Years Old

A conductor on a Burlington train near Jewell City, Mo., the other day found Mrs. Frank Scott had only one ticket for herself and thirteen children. The children occupied five double seats. "Are these all your children, or is it a picnic?" asked the conductor. They were all the children of Mrs. Scott and she had the family Bible in her suitcase to prove it. The Scotts have been married less than ten years and have thirteen children, all boys. There are five sets of twins. The thirteen above mentioned were all under five and could ride free. They were being taken by their mother on a visit to relatives in Canada.

## Canadian Ayrshires Win Prizes

A telegram to the Canadian Ayrshire Association of Great Britain and Ireland, announces that Ayrshires took six champion cups at the recent Royal Dairy Show, London.

It was a wit who said that "any free citizen can do as he pleases, except for his conscience, his wife, his landlord and his neighbors."

## A Western Editor M.P.

Cameron R. McIntosh, B.A., Liberal member for North Battleford, is the only editor which Western Canada is sending to Ottawa. Mr. McIntosh publishes three weekly newspapers, The North Battleford News, The Turf and Record and the St. Walburg Times. Mr. McIntosh has been an active member of the Saskatchewan Press Association since it was first formed, and on the executive since it had an executive, serving several terms as president. He was one of the Saskatchewan editors who went over to the European continent with the Canadian Weekly Newspaper excursion in 1924 and were honored in most of the capitals of Europe, and entertained by royalty in Great Britain and Belgium, and by Marshal Foch in Paris. He is an enthusiastic Canadian Club member, organizer and first president of the Canadian Club of the Battlefords, and for two years represented Saskatchewan as vice-president on the national executive of the Canadian Clubs of Canada.

Frocks That Have Made Themselves Very Popular

Simple enough for street wear—and charming enough for bridge or dance! Fashion still smiles upon these simple frocks, both of which were fashioned from one pattern. The little frock of flowered material has two side panels trimmed with narrow lace, and then shirred onto the one-piece foundation at the raised waist-line. The round neck and short kimono sleeves are finished with the narrow lace, and a ribbon of pastel color ties in long ends at the back. A bordered material was used with charming effect for the plain frock, which opens at the neck with flat revers and has long sleeves gathered into a narrow band. No. 1166 is in sizes, 16, 18 and 20 years (or 34, 36 and 38 inches bust). Size 18 years (or 36 bust) requires 2 1/2 yards of 32-inch or 36-inch material. For side panels 3/4 yard extra material, and for long sleeves 1/2 yard. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

## Walking Stick Farms In England

Walking stick farms are not uncommon in England. To obtain a right-angled handle, the growth is pegged down along the ground, and from this reclining stalk the sapling shoots upward vertically.

## Studying Oriental Progress

Mrs. Thompson Seton Says Egyptian Women Most Advanced

Mrs. Thompson Seton, who has just returned from India, finishing a three year's survey she has made of the Oriental woman, spending a year each in India, China and Egypt, says:

"Of these countries I found the Egyptian woman most advanced in politics and in social work," she says. "She is most like the occidental woman in her viewpoint and her method of approach to a situation. The Egyptian women are highly educated and have been political insight."

"I found the women of China remarkably progressive in a substantial way. Since 1912, when the Chinese republic accorded them equal citizenship with men and let them unbind their feet, they have made astounding progress in the professions and in civic life."

"The mother of the household in China has always been important. She has no inferiority complex to combat. She never loses control of her children. Age there is respected and honored. Therefore, women are used to ruling and dominating in a small domain and have only to extend their borders. They already have the qualities of executives."

"The women of India have made the least progress, she finds, due largely, she believes, to the caste system which prevails and keeps both sexes bound by insurmountable barriers."

## Will Celebrate Xmas On Old Homesteads In Quebec

Personally Conducted Tour to Ste. Anne de Beaupre and Montreal Over Canadian National Lines

Several hundred French-Canadian residents of Western Canada, travelling eastward by special train over the lines of the Canadian National Railways, will spend their Christmas holidays this year in old Quebec, according to an announcement made at railway headquarters. The departure of the special train from the west will be unique, in that, while during the last two years special trains of French-Canadians have come westward over Canadian National lines under the auspices of the Liaison Francaise movement, this will be the first occasion of a return visit from westerners under similar circumstances. The east-bound excursion is under the auspices of L'Association Catholique Franco-Canadienne de la Saskatchewan, and it is estimated that several hundred persons will be on the train.

The party will leave the various provinces on the following dates: Alberta, December 17; Saskatchewan, the 18th; and Manitoba, the 19th, and will arrive at the famous shrine of Ste. Anne de Beaupre in time for midnight mass on Christmas Eve, later returning as a party to Montreal, where they will disperse to various parts of Quebec province before returning west.

## A Manitoba Handbook

Opportunities Which Await the Settler In This Western Province

The statement issued recently by J. H. Evans, deputy minister of agriculture for Manitoba, that there had not been a single crop failure in Manitoba this year has attracted a great deal of attention to the agricultural possibilities of that province, and many inquiries are being received by the natural resources intelligence service of the department of the interior for information. To meet this demand, a new edition of the branch's handbook, thoroughly revised, has been issued, and may be had on request. A vast fund of information is contained in the handbook, each phase of the province's development being separately dealt with, while the opportunities which await the settler or the visitor are clearly shown. Manitoba is making rapid progress, both industrially and agriculturally, and to those who are interested in Canada and its several provinces this handbook of Manitoba supplies the information in a readable and interesting form.

## Nineteen Lepers In Dominion

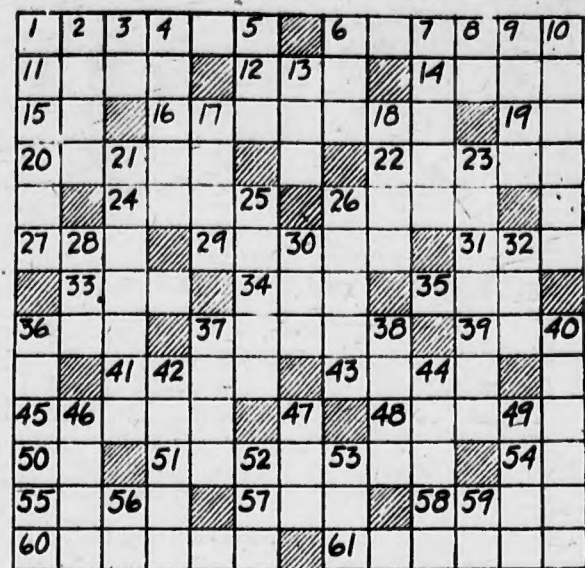

Ten In New Brunswick and Nine In British Columbia

There are nineteen lepers in Canada, ten in New Brunswick and nine in British Columbia. This information was given at a lecture given in Simcoe by Rev. H. N. Konkie, travelling secretary representing the Mission to Lepers, an interdenominational society founded in 1874. The mission works at 95 stations in 13 countries. It is estimated that there are at least a million lepers in the world, and up to the present the society has been able to reach only 16,700.

The Himalayas in south central Asia are the loftiest mountains in the world.

Another good place for a "Watch your step" sign is just above the accelerator.

## OUR CROSSWORD PUZZLE

## Horizontal

- 1—To drive out from.
- 6—Clutches.
- 11—An animal.
- 12—Girl's name.
- 14—A cleansing agent soluble in water.
- 15—Hesitate in speech.
- 16—A goddess of retributive justice.
- 19—Point of compass.
- 20—A flower.
- 22—Pester.
- 24—Dry.
- 26—Performs.
- 27—Male descendant.
- 29—Next in order after the eighth.
- 31—A secretion from inflamed tissues.
- 32—One of the stages of life.
- 34—Large container.
- 35—Affirmative.
- 36—Part of verb to be.
- 37—Lukewarm.

## Vertical

- 2—Color.
- 4—By.
- 43—Head cover (pl.).
- 45—Fundamental.
- 48—Pours.
- 50—Man's nickname.
- 51—Repeated as a lesson.
- 54—Part of verb to be.
- 55—Whirl.
- 57—Gone by.
- 58—A melody.
- 60—An aromatic substance flowing from certain plants and trees.
- 61—A disease.

## 10—Hastens.

- 13—Lair.
- 17—Ireland.
- 18—A constant irritating desire.
- 21—Touching.
- 22—To slander.
- 25—One who dives.
- 26—A garret.
- 28—Propeller.
- 30—Short sleep.
- 32—Employ.
- 36—A part of speech.
- 37—Story.
- 38—An edible fruit.
- 40—Appall.
- 42—Noblemen.
- 44—Treadle.
- 46—A mental image.
- 47—Immense.
- 49—Servant.
- 52—A rotar.
- 53—Man's name.
- 56—Article (Span.).
- 59—Royal Academy (abbr.).

## Keep Tenth Commandment

One Reason Why Canada and U. S. Live Peaceably

Canadian officials have issued figures on the automobile tourist influx into the Dominion during the past summer, setting forth that 2,000,000 automobiles crossed the line, carrying 9,000,000 travelers. The astonishing fact is that these 9,000,000 strangers, chiefly from "the States," equalled in number the total population of Canada.

That is, sightseeing Americans doubled temporarily the population of our northern neighbor. The migration was made without difficulty. The visitors spoke the same language, ate the same food, near the border United States currency was accepted without question. A common language has much to do with the ease with which tourists are made at home. The chief reason for this freedom of travel is that Canada and the United States are free from flag rivalry. Politically, Canada and America keep the Tenth Commandment. If European countries would not "covet thy neighbor's goods" many munition factories would go broke.—San Francisco Bulletin.

## High Standard Of Living

Conditions of Living in United States Highest in History Says Hoover

Material conditions of living for the people of the United States during the last year have been the "highest in all history," Secretary of Commerce Hoover declared in an economic review made public as part of the annual report of the commerce department.

Factors listed by the secretary as contributing to this condition included a practically complete absence of unemployment, high wages, efficient railroad operation, an equitable balance of prices as among the greater producing groups of the population, and a gradual return to stable currencies and normal business operations among the nations abroad.

## Novelty In Radio Reception

According to recent reports, the city of Rome offers the newest novelty in radio reception, in the form of "penny" in the slot radio listening stations. For the equivalent of one penny, a pair of phones are placed on the head of the listener and he is allowed to hear one selection. There is but one master receiver and many sets of phones, but the listener must be content with whatever the operator tunes in.

## Broadcasting Duck Calls

Oakland, Calif.—A device for broadcasting duck calls has been invented by J. V. O'Hara, president of the Vallejo Gun Club. Radio apparatus has been installed in the club's preserves, and with the opening of the shooting season in October, an alluring "quack, quack, quack" was scattered among the duck blinds.

## Need Alaskan Base

For Polar Flights

Useless to Attempt Trip Otherwise Says Veteran Arctic Navigator

Aircraft can be successfully utilized in Polar exploration, providing the flights are attempted from a large base in Alaska, according to Captain Bob Bartlett, veteran Arctic navigator, who was one of the late Commander Peary's party when he made his dash to the Pole in 1909.

"It is useless to attempt to fly across the vast Arctic regions adjacent to the Pole, with only a few months preparation and with small planes," said Captain Bartlett. "And personally, I don't believe it is wise to expend large sums for expeditions of this nature that hope to make the flight from such places as Etah. There is one place where these flights can be started, and that is off the Alaskan coast and in the Polar Basin."

## Find Valuable Collection

Chest of Drawers in Mayfair Yields \$75,000 in Stamps

A collection of postage stamps hidden in an old bureau in a Mayfair home in London, sixty years ago has been accidentally discovered, and found worth \$75,000. The original value was \$150. Search for a lost jewel case led to unearthing the famous collection of stamps. Some of the stamps were never before seen by collectors. The most interesting are two sheets of halfpenny Ceylon stamps, issued in 1858—the only sheets of these stamps existing. The grandfather of the owner's husband collected the stamps when he was young. Collectors from many parts of Europe will attend the sale of the collection.

## Wonderful New Device

A demonstration of a device for the phonographic recording of heart sounds, which is expected eventually to save thousands of lives annually, by making possible improved methods of diagnosing heart diseases, has been given by the Columbia Phonograph Company, New York. It is possible to record sounds which ordinarily are so faint as to escape detection by the human ear.

A giant salamander may live to be more than a half century old.

## Here and There

Major-General Sir Fabian Ware, vice-chairman of the Imperial War Graves Commission, who has been visiting in Canada during October, has been recalled to England much earlier than he expected. Prior to sailing on the Canadian Pacific liner, Montclare, from Montreal, he expressed the hope that he would be able to come to Canada again next spring so that he could give Canadians in the West some idea of what the Imperial Commission is doing in caring for the graves of western youths who perished during the war.

Robert L. Rice, Jr., of Boston, and J. Y. Cole, of Harvard, took big chances when they attempted to travel by canoe from Rouyn to Angliers at the end of October. Although they started in beautiful Indian summer weather they ran within a few hours into a bad storm which filled their canoe with half melted snow and almost froze them into unconsciousness. Fortunately they arrived in the nick of time at a fire-ranger's hut where they stayed a few days until the storm abated. They were prospecting in the neighborhood and were none the worse for their perilous trip when they finally reached Montreal.

Bob Shawkey, New York Yankee veteran pitcher, who organized the party of major league baseball players now hunting big game in New Brunswick, shot a moose with antlers spreading 56 inches and having 23 points, according to word received at Fredericton, N.B. Shawkey shot his moose the first day the party spent in the woods. This information is conveyed by another party of hunters who passed the camp of the ball players at Nepisiqui Lakes. In the group are some of the best known players in the American League, Eddie Collins, Babe Ruth and Muddy Ruel being among them.

The romance of a world cruise culminated in New York City recently when Dorothy Holmes O'Ryan, daughter of Major-General and Mrs. John F. O'Ryan, of New York, married Darwin Curtis, of Chicago. The couple met for the first time a year ago on board the Canadian Pacific liner Empress of France which was then making a tour of the world. It is feared they had no eyes for the world marvels which were unrolled before them on the tour, since it is stated they fell in love at first sight and could only see each other. The marriage was performed by the Rev. Father Francis P. Duffy, chaplain of the "Fighting Sixty-ninth," a regiment commanded by the bride's father during the war.

Good reading for Canadian Pacific shareholders is furnished in the September statement of gross earnings, working expenses and net profits. It has been the most favorable month for the company in a long time. The gross earnings were \$18,909,071, the greatest shown in any month since October, 1924. Operating expenses were \$12,641,452 and the difference between the two, the net profits \$6,267,619, an increase of \$1,719,973 over the corresponding month of last year. Net earnings for the first three quarters of this year, ending September 30th, is \$1,190,039 greater than the 1924 figures, despite a decrease in gross earnings of over four and a half million dollars. This was made possible by the company's policy of rigid economy.

To bring the Arctic within the scope of tourist traffic is the object of the Marquis M. N. de la Riviere, winter sports director at Lake Placid, who is organizing pack horse trips of thirty days' duration next year from the Canadian Pacific Rockies as far north as the Columbia Ice Fields within the Arctic Circle. "We are going to swim our horses and outfit across the Saskatchewan River and camp near the sources of the Athabasca which empties into Great Slave Lake and thence into the Arctic," the Marquis asserts. The first of these trips is scheduled between June 28 and July 27 next year.

GLEICHEN, ALBERTA, WEDNESDAY

GLEICHEN COMMUNITY HALL

Next Monday a general meeting of the members of the Gleichen Community Hall is called by the directors to discuss the business of the association and it is hoped that a good attendance of the members will be present as there are questions of no little moment to be discussed and decided upon, which every member is personally interested in and also in which the public generally is keenly interested in as the people as a whole since the undertaking have been called upon to assist in many ways to which a generous response has been enthusiastically given.

WHO IS THE HOME MERCHANT?

The home merchant, who is he? He is the chap who gives you credit when you are financially broke, and who carries your account until you are able to pay.

He is the chap who gives you back your money or makes exchanges when you are not satisfied with what you have bought.

He is the chap who meets you at the door with handshake and lets you out with a message to the "kids" and a real "come again, goodbye".

He is the chap whose clerks live in the home town and spend their money with you and other local people.

He is the chap who helps support our churches and charitable organizations and talks for the home town and boosts for it every day in the year; and will not admit there is a better class of people.

He is the chap who visits you when you are sick, who sends flowers to your family when you die, and follows your body out among the trees and tombs, as far as human feet may travel with the dead.

He is the home merchant—your neighbor—your helper in time of need.

Don't you think you ought to trade with him and be his friend and his helper time of need?

Don't you know that every dollar you send out of town for merchandise is set to straglers—to me who never spend a dollar here? You don't save much, usually nothing, when you send your money out of town. And don't you know that the growth and prosperity of this town and community depend largely upon the success and prosperity of the home merchant? Out of town people judge our town by the appearance of our stores and the degree of enterprise shown by our merchants. And our home merchants cannot succeed unless home folks give them loyal support.

Optimists blow the horn of plenty and pessimists come out of the little end.

A half million men, it is said, are using cosmetics, but there are still plenty of he-men left who wash their faces and comb their hair in the good o. f. way.

A new rado set is being advertised "hardly larger than a watch." Yes, and the world hopes hardly any louder.

Facts show that men are getting smaller every generation. Who wouldn't—work all day to make it and stay up all night to see how much they owe the community.

It is about time to begin looking out for colds and one Gleichen man goes on to explain that colds will come and colds will go, nobody knows where from nor where to, and nobody cares just so they don't come to them.

It is not so much the idle rich but the idle young that is raising the devil with the country. On every hand you see young people shying from work and trying to get by without it. It scarcely ever wins. Too much pampering and too little enforcement of discipline by parents is largely to blame for the overflowing of jails, reformatories and penitentiaries. Any child not brought up to work and obey his parents will sneer at the law when he gets out into the world for himself. If you have a child and would make him a good citizen, teach him to work and make him obey.

The world owes you a living but you must show it what for.

The dog is man's best friend until friend wife brings home a poodle.

HENDERSON & MALLORY

Owing to the frequency of Farm Fires, the attention of Farmers is especially drawn to the very low rates charged for insurance of grain whilst stored in barns or granaries. The result of a year's work is often swept away in an hour, and every farmer should protect himself by carrying a policy with

## Be Not Deceived

You can't buy a suit or dress worth \$40.00 at half the price. We won't get any more than we pay for, often less.

And you can't get a pair of glasses worth \$12.00 to \$15.00 at half the price.

If you think no more of your eyesight than to be satisfied with a "superficial" examination and inferior glasses—then only pay what they are worth—which isn't much.

Don't throw away good money, thinking that you can get a real examination and the best quality of lenses and frames for half their real value—you can't!

A good pair of glasses—correctly fitted—will last for years and be a source of real comfort and pleasure.

You will only have one pair of eyes. Be particularly careful with whom you trust them.

Registered by the Boards of Examiners of Ontario, Manitoba and Alberta—with over 51,000 satisfied pairs of eyes to our credit in 20 years practice—is a record of which we feel justly proud.

Examining eyes, grinding lenses and fitting glasses is all we know but we know that well!
